## **DETAILED ACTION**

### ***Claim Objections***

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. Prior to listing new claims the applicant needs to state the disposition of the previously presented claims. For the purposes of this office action, the examiner will assume that claims 1-16 have been cancelled.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 17 –23 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are:

In regards to claims 17 and 19-23, claim 17 appears to omit the covering shell, as shown in Applicant's drawings as Fig. 6, as part of the claimed invention. This element appears critical to the Applicant's invention as it is needed for the user to operate the computer program operation interface.

In regards to claims 18 and 20-23, claim 18 appears to omit the base, as shown in Fig. 5, as part of the claimed invention. This element appears critical to the Applicant's invention as it is needed for computer program operation interface to function.

### ***Claim Objections***

Claims 20-23 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only (meaning that claim 20 cannot depend on both claim 18 and claim 19). See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

### ***Conclusion***

An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site <http://www.uspto.gov> in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450.
